# Evofire IP65 Fire Rated Downlights

The Evofire Fire Rated Downlight is a safe and attractive fitting for an LED GU10 or MR16 lamp\*. Lamps installed in an Evofire run at up to 10°C cooler than a typical can-style fire rated downlight - this can extend the lifetime of your lamps.

- Fire-resistant glass positioned below the lamp
- Low profile body - ideal for shallow ceilings
- Lightweight steel construction, easy to install and remove from ceiling to change lamps
- High-quality powder coated finish
- Engineered and patented in the UK by Integral LED
- Quality assured with 3 year warranty
- Certified by UKAS EXOVA Warringtonfire
- Choose your own lamp to fit inside - offers more flexibility than others fire rated downlights

Models available with Insulation Guard so that loft insulation can be safely placed over the downlight.

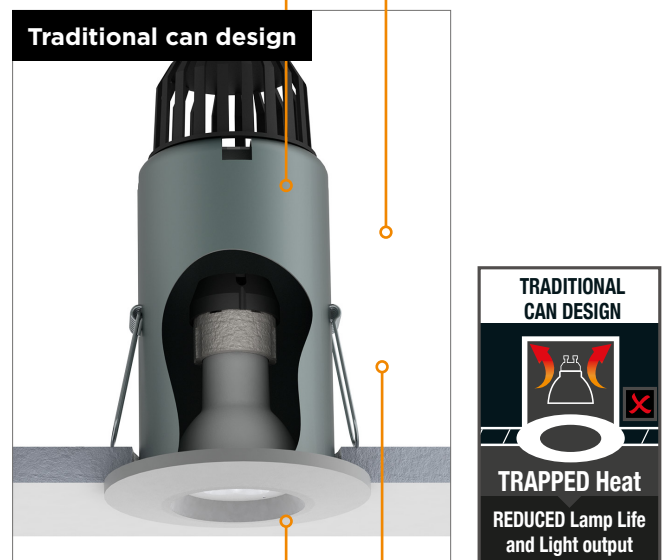

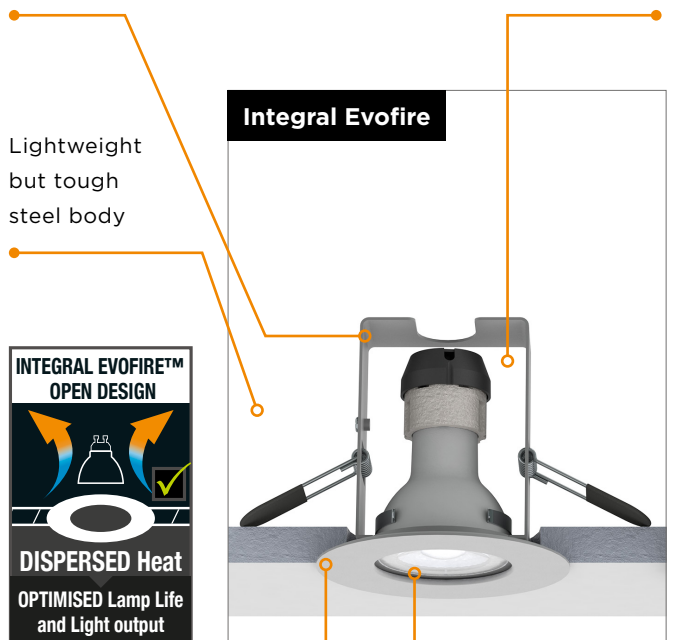

Selected models feature an Insulation Guard allowing loft insulation to be safely laid over the downlight

Evolutionary canless design allows more heat to disperse, prolonging LED lamp life - Patent pending

'Can' design traps heat, leading to reduced lamp life

Fire protection situated behind the lamp and above the ceiling

Ultra-thin (1mm) steel 'blend-in' bezel for a discreet finish; downlight looks great in any ceiling

Fire resistant glass positioned in front of lamp and below ceiling

Bulky bezel up to 8mm

Insulation Guard and bezel sold separately at additional cost

\* Lamp not included
