

DATA SHEET

RUNPOSTICKS Comfort - 19 parts

SLIDING HOOK WITH TILTING FUNCTION

Many mounting possibilities for any kind of cable, excellent gliding behaviour, special sliding hook made of stainless steel with tilting function.

LED-LAMP

very high and long luminosity because of AAA Duracell-battery, shockproof, impact resistant

CONTENT

STICKS Ø 4,5 mm/yellow	2 pieces	bending behavior (soft) - tension load - 200 kg
STICKS Ø 5,5 mm/black	3 pieces	bending behavior (medium) - tension load - 240 kg
STICKS Ø 6,5 mm/red	5 pieces	bending behavior (hard) - tension load - 270 kg
SLIDING HOOK	1 pieces	managed barriers up to 6,5 cm height
LED-LAMP	1 pieces	very high luminosity, shockproof, AAA Duracell battery
RUNPOGLIDER	1 pieces	patented viewfinder top with extrem bending radius
MAGNET	1 pieces	very strong magnet - holds up to 2,5 kg
BALL CHAIN Ø 4,5 mm	1 pieces	for targeted performing at various wall openings
EYE WITH RING	1 pieces	additional ring for cable
SNAP HOOK	1 pieces	for catch of cables and wires
CONNECTION THREAD	1 pieces	connecting piece with outside threadings
STORAGE BAG	1 pieces	with storage for all the accessories and shoulder strap

SPECIFICATIONS

(RRP/excl. of VAT)

ITEM NO.	10020
PRICE €	€ 129,15
THREAD	RUNPOTEC RTG Ø 6 mm thread
ROD MATERIAL	basalt rod with extrem bending radius
DIMENSIONS mm	H 50 / L 1005 / D 110

DESCRIPTION

The RUNPOSTICKS are ideal for following application: drop ceilings, cavity walls, shafts – generally every working situation without installed pipes. Because of the new basalt technology the bending radius from every stick is extremely high although the sticks keep shape. The RUNPOTEC connection threads are pressed and glued, made of stainless steel so there is no rust anyway, and no abutting edges also to avoid hang in somewhere during work. With the high quality magnet you can lift items (tools, screws) up to 2,5 kg. The ballchain is 0,5 m long and enables in combination with the magnet to search/find exactly the right hole in the wall. Especially if there is only a small gap/shaft or a little hole it is a lot easier and faster to work with ballchain and magnet! Don't use the ballchain for cable pulling! RUNPOGLIDER with swivel can be used for pushing and pulling! Eyelet with the ring can be used for pushing and pulling. When working in drop ceilings barriers at a height of 8,5 cm are no problem anymore because of the new special sliding hook with tilting function, with the red ring from the sliding hook it is also possible to rotate left or right as it is shown on our video. The light ON time and luminous power of the screwed LED lamp is very high, it is extremely impact resistant and comes standardly with a triple AAA Duracell battery. **Comfort packet:** contains 10 sticks - every stick is 1 metre long and all of the spare parts can be screwed on every stick - special sliding hook (tilting function), LED lamp, ballchain, magnet, small hook, connecting piece with outside threadings, eyelet with ring, RUNPOGLIDER with swivel. **Standard packet:** The same as comfort but WITHOUT sliding hook and LED lamp, for a lower price. The carrying bag is with zip and shoulder strap where all spare parts are properly packed.
