

Mighty Strength

Seal & Fix

The Seal & Fix is a high quality, universal adhesive and sealant based on hybrid technology for both interior and exterior applications.

Seal & Fix Adhesive may be used safely in food preparation areas and cold storage. Has excellent adhesion to most non-porous surfaces, will bond to damp surfaces and is paintable with water based and two component paints.

This product is based on a neutral curing system, where it cures under the influence of humidity to form a durable elastic seal and is free from isocyanates. As well as being fast curing and almost odourless, it is also non-corrosive to metals and has good resistance to UV, weather and water.

Suitable for a wide range of applications

The Seal & Fix Adhesive is suitable for sealing joints around sanitary fixtures, perimeter joints around window and door frames and joints and assemblies in coach body work.

Also it can be used for gluing panels, skirting boards, thresholds and insulation materials. It will seal and bond porcelain, coated metal, epoxy and polyester panels, PVCu, stainless steel, anodised aluminium and finished wood.

It also has excellent anti-pick qualities making this product suitable for use in correctional institutions and areas where vandalism of sealant may occur.

SIROFLEX BY UNICRIMP

An incredible, instant grab adhesive based on hybrid technology. It has initial bond strength double that of most other grab adhesives and bonds to vertical surfaces without slippage, eliminating the need for secondary support in the majority of applications.
